## How to Get the Most Value For Your Money

NO mechanical adjustments to make except the turning of one screw to bring the bowl to the correct height—once a year, perhaps; every bearing oiled with clean, fresh oil before the handle makes a quarter turn; no chance to injure the spindle or spindle bearings when replacing the bowl. These are three exclusive Primrose separator features.

Just think what those features mean to you. Nothing goes wrong on a Primrose, because there is nothing to go wrong. There are no adjustments to make for ordinary work. The milk supply bowl is firmly set in one place—the right place. The milk float goes into just the right position, either side up. Every bearing is plentifully oiled before you begin to skim. The gears are all rigidly fastened. The bowl has the cleanest, closest-skimming device and the largest skimming surface ever put into a cream separator.

The Primrose is worth more than any other separator built, and it sells for less than many of them. Drop in and let us show you why.

We notice that but few of the papers throughout the Thumb of Michigan have published their statements of ownership October 1st, as is called for by the postoffice department at Washington. Ever since the order was first sent out, the Expositor has printed its statement each time it was called for.

The coaster wagons and other out-lets of similar nature are a nuisance to pedestrians of the city and many complaints are made to this office regarding them. Other places are prohibiting their use except when drawn by hand, and we believe it would be a move in the right direction should the city of Yale put a stop to the reckless operating of them.

Darwin Ostrander had his arm broken in four places, and was badly burned about his arm, shoulder and right side of head while trying to extinguish a fire which caught in the barn on the George Calender farm. While Mr. Ostrander was threshing there Friday the machine, together with the barn and contents were completely destroyed. No insurance. Dr. Campbell was called and Mr. Ostrander was taken to the Port Huron hospital Friday evening.—Brown City Banner.

### WRECKERS PREPARE TO GO AFTER PRICE

Port Huron, Mich., Oct. 9. — The American Salvage company, of New York is about to begin salvaging operations on the steamer Charles S. Price. Several attempts have been made to recover the Price by the largest wrecking companies on the lakes.

G. W. Sissons, who is in charge of the wrecking project, does not appear to have much to say concerning the operating plans, but it is understood something new in salvaging overturned steamers like the Price, will be attempted, which it is expected, will make short work of the job if moderate weather prevails. It is asserted the Price will be resting in quiet waters in St. Clair river before cold weather sets in.

The steamer Brokate of the United Fuel & Supply company, of Detroit, has been chartered and is being fitted out with air compressors and dynamo preparatory to leaving Thursday.

Ed Sheehy will load hogs and sheep at Yale Saturday, Oct. 26th. If you have anything to sell see him or phone 125.

Expositor liners pay.

## Every Day, Women Marvel at Our Wonderful Style-Values in ...New Waists...

With the "Underfeed" method the  
smoke, gas and soot are consumed

If you want to get away from the disagreeable feature of the smoke rushing out into your face every time you put soft coal on the fire, try the

### "Renown" Underfeed Heater

The coal is fed under the fire and the smoke and gas are forced up through the red hot coals, where they are mixed with highly heated air and consumed. Don't smother your fire by putting soft coal on top of it.

You will positively save 25% or more  
on your fuel bill and get more heat

We will guarantee that this stove will not puff or explode, if operated according to our instructions.
